Effect of Yagya Science on Environment: A Review

Manan Kumar Agrawal¹, Saloni Malik^{*2}, Anshu³¹ PhD Scholar, Banaras Hindu Vishwavidyalaya² PhD Scholar, AIIMS Rishikesh³ PhD Scholar, AIIMS Rishikesh*Received: 24 Nov 2021 Revised: 03 Dec 2021 Accepted: 11 Feb 2022*

Abstract

Yagya is one such meaningful gift given by the sages of Indian culture to Sadi Vasudha, which is considered the basis for maintaining the most productive and holistic environmental center.

Rishis say: Ayam yajno vishwasya bhuvanasya nabhih.!

By saying Yagya, Bhuvan has eaten the base point of the creation of this world. Yogi raj himself says, Shri Krishna. saha-yajñāḥ prajāḥ sṛṣṭvā purovācha prajāpatiḥ! anena prasaviṣhyadhvam eṣha vo 'stviṣṭa-kāma-dhuk!!

In other words: Prajapati Brahma created the subjects and the yajna at the beginning of Kalfa and told them that they might achieve growth through this Yagya. Here the Yagya is going to provide you the desired enjoyment. Yagya is a high level of effort made for charity. Yagya a type of tax: tax: For not giving it to God power like a state. Administration punishes the people. In the same way, the fears come in different forms and create their wrath on the saree world. There is a scientific basis to avoid divine wrath – Yagya. It involves incorporating divinity into the inner world, in the soul of the living being, and by sacrificing the soul of the Apana. The real yajna is to make the samadhi of life home in the form of society. If Satpravarti continues to be included in the feelings, then this is the natural form of Yagya. “Yagyoayam sarvakam dhuk ” Yagya is not the only way to fulfil all desires but the best scientific method of living life is

Introduction

Yagya is part of Indian culture. Yagya is considered to be the core of Indian culture. Since ancient times, the centre of self-realization, heaven-pleasure, freedom from bondage, mind-siddhi, atonement for sins, self-power, siddhi-siddhis, etc., was the centre of sacrifice. Man gets many spiritual and material benefits by performing these sacrifices [1]. Yagya It not only improves the environment but also has therapeutic effects. When the priest performs the Yagya with the Holy Spirit through

The sacred scriptures and the Veda mantras, the patient can be cured just by sitting in that divine environment. The human body is made of gross, subtle, and causal. Where the doctor treats only the ground body with various medicines. At the same time, the access of Yagya is to the ground, subtle and causal body. Due to which all three bodies are disease-free. Yagya is a scientific process. This is the best work to be done for the welfare of the lake.

The meaning of Yagya is vast.

The word Yagya is derived from the suffix 'nad' in the formula. The universally accepted sense of the word Yagya is - worship, association, and charity.

yaj devpujasangatikarandaneshu!! [2-3]

Acharya Yask, while interpreting the word Dave in Nirukta Shastra, says that-

Deepnadha ghotanadha dhustanao bhavtiti va!! [4]

Those who give charity to others, illuminate others, and remain situated in the luminous world are called Devas, and worshiping them is called Dev-worship.

Consistency

Consistency means being together.

Yajanam dharmadeshjatimaryadaraksharyee mahapurushanamekikaranam yagyam!!

To organize and gather the best men to protect the dignity of religion, country, caste is a Yagya.

Charity

Charity is considered a very noble act. It is called-

Yajanam yathashaktideshkalpatraadivicharpurrsar dwavyaadi tyag!!

The money which is given for a good purpose after considering the Kaal Patra is called Yagya. It is also said in Manu smriti that

Sarveshamev danananm bhrahmadanam vishisyayate! Varyanngomahivasastilkanchnsarpisham!! [5]

Of all the donations in the world, i.e., water, food, cow, earth, clothes, sesame seeds, gold, and ghee, the gift of Veda Vidya is the highest.

It is also said in Shrimad Bhagavad Gita that **Yagyadantap karma n tyajyam karyamev tat!**

Yagy danam tapeschchav pavnani manishinam!! [6]

Actions in the form of sacrifice, charity, and penance are not worth relinquishing. Still, they are duty because of gift, charity, and austerity-all these three actions are supposed to sanctify wise men.

In ancient times, there were sacrifices for the growth of health and the prevention of diseases; they were called Bhaishaj Yagya. Many sutras regarding medicine are available in Sankalp Shastras.

Agnikranotu bhesjham [7]

That is, the Yagni also acts as a medicine. Brahma Kaye of these Bhaishaj Yagyas was a well-versed scholar of health science. She used to know by subtle scientific examination which disease is spread due to the increase in the atmosphere of this region and which medicines are available for its prevention. It should be used as a haven. We find many descriptions of such Bhaishaj Yagyas in Vedic texts.

The university scientists have succeeded in destroying the germ called Alvin, which harms the crops of South America, with the smoke of Yagya. According to the claim of these scientists, this smoke travels up to eight kilometers and eliminates the pollution of the air there

and helps in the healthy development of the crops of that area [8].

Importance of Yagya

Most of the Vedas describe the praise and prayers of Yagya. It describes the powers and benefits embodied in the Yagya.

Om Shiva namasi swadhitiste pita Namaste astu mama himsih. !Nivartayamyayusheannadhyaya prajannaya. Rayasposhaya suprajastwaya suviraya [9]

You mean - O sacrifice! You are a benefactor. Swayambhu, God is your father. Hello to you. You protect us. We consume you with reverence and faith for long life, good food, fertility, opulence-prosperity, best progeny, and good luck.

Ayamagni purishyo rayiman pushtivardhman!

Agne purishyabhi dhugmabhi sahaaa yachsvav!! [10]

Meaning- This yajna is the one who brings rain, gives wealth, and increases strength and strength. O pure fire! May you spread power and fame all around us.

The Yagya has special significance from the point of view of the environment. Maharishi Dayanand says that

Saa chaagnihotramarhyashavmedhparyanteshu yagyeshu sugandhimistt rognasak guneyuktasaya amyak sansakarensodhistasya dravyasya vayuvristi jalshudhikarnaathmagno home kiryate, sa taddwara sarvajagat sukhkaryev bhavti !! [11]

This ritual is performed with four types of substances - fragrant, sweet, having favorable properties, and having anti-inflammatory properties. When these four substances are purified and sanctified, when they are homed in the fire, the whole world gets happiness. They go on

Tathev yagyadhyo vashpo jayate sam vayum vrastijalam cha nirdosha kratva sarvajagte sukhayeev bhavti!! [12]

The vapor that emanates from this sacrifice, making the air and rainwater spotless and fragrant, is pleasant to the world.

"Five Teachings of Yagyaagni

"It has been told-

1. To be always hot means to be active
2. Jyot means to remain exemplary,
3. To make the person coming in contact like you
4. Keep on distributing, not collecting achievements
5. Keeping the high flame means not to let down thinking and self-respect.

These ideals are called Panchsheel. Which are used in different ways for different purposes on other occasions [13]

Development of holistic personality through Yagya

Yagya brings about radical changes in human life. His complete physical, mental, intellectual, and spiritual development takes place by Yagya. As stated in Yajurveda

Pranasch meapanasch meavyansch meyasusch me chittam cha mei aadhiitam cha mei vak cha mei manasch mei chakshusch mei shotram cha mei dakshsch mei balam cha mei yagyen kalptaam!! [14]

May, my prana, my Apana, my vyana, my other prana, my Chitta, my thoughts, my speech, my mind, my eyes, my ears, my efficiency, and my strength be filled with Yagya – more intense and effective by being filled with sacrificial energy Yes.

Ayuyagyen kalpatam prano yagyen kalpatam chakshuyagyen kalpatam shortam! yagyen kalpanatam vagyen kalptam mano yagyen kalptamatma yagyen kalpatam!! [15]

That is, life through sacrifice, life through sacrifice, vision power from a gift, hearing power through sacrifice, speech power through sacrifice, mind through sacrifice, and soul from sacrifice became strong, powerful, and robust.

Remedy of disease adhi vyadhi

Yagya is a scientific process. When we offer ghee, food, medicines, etc., in the fire of sacrifice, their curative smell spreads in the atmosphere. He fills that air in his lungs by breathing. There that air has direct contact with the blood. That air carries its existing disease-preventing atoms to the blood. This process is depicted in the following Vedas:

Dwavimo vato vat aa sindhora paravat!

Daksham te anye aa vatu pranyo vatuam yadrap!! [16]

These two breaths of air in the form of breath and exhalation move, one from the outside atmosphere to the blood ocean of the lungs and the other from the lungs to the lungs outer atmosphere. The first of these is, O patient! Make you get the healing power of the rage, take out with you what is suspected in the other's blood.

Conclusions

Yagyoyam sarvakamdhuk "But" is the best scientific way of living life. According to Maharishi Dayanand, 'As long as there was propaganda to do this, the country

of Aryavarta was free from diseases and full of happiness. Therefore, by which as much effort as can be made and money should be spent on the growth of education. Yagya is a type of tax. Just as the state administration punishes the people for not giving it to the deities, similarly, the fears come in different forms and create their fury on the whole world. The scientific basis for avoiding divine wrath is Yagya. Yagya is not the only way to fulfil all desires. Therefore, Yagya is essential for the welfare of the nation and the sophistication of the environment.
